

PROJECT 10073 RECORD

1. DATE - TIME GROUP 21 Feb 67 22/0600Z	2. LOCATION Englewood, Colorado one witness
3. SOURCE Civilian	10. CONCLUSION Astro(Aldebaran) <i>Poss. just Russell data</i> Aldebaran was on Az of 272 deg at an El of 24 deg
4. NUMBER OF OBJECTS One	11. BRIEF SUMMARY AND ANALYSIS Observer watched a peach colored object in the western sky that later changed to a more reddish color. Object was just above the mountains. The object was at approximately a 45 degree elevation above the horizon. Object was in view for about five minutes before the observer stopped watching. The object did not disappear. The description is consistent with that of an astronomical observation. The star, Aldebaran was at the approximate location of the unknown and could account for the observation.
5. LENGTH OF OBSERVATION 5 minutes plus	
6. TYPE OF OBSERVATION Ground Visual	
7. COURSE Basically Stationary	
8. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
9. PHYSICAL EVIDENCE <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

REPLY TO
ATTN OF: XPCP

Date 24 Feb 1967

SUBJECT: Unidentified Flying Objects (UFO)

TO:

When unidentified flying objects (UFO) are reported, the following information will be filled in and then forwarded immediately to Plans/Program attention XPCP.

a. Description of the Object(s):

(1) Shape. Round

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Larger than known object.

(3) Color. Peach

(4) Number. One

(5) Formation, if more than one. _____

(6) Any discernible features or details. Changed to reddish color

on heading West toward mountains.

(7) Tail, trail, or exhaust, including size of same compared to size of object(s). None

(8) Sound. If heard, describe sound. None

(9) Other pertinent or unusual features None

*Albuquerque
2720 AF 2402*

b. Description of course of Object(s):

(1) What first called the attention of observer(s) to the object(s)?

Returning from bathroom and glanced out window.

(2) Angle or elevation and azimuth of the object(s) when first observed. 45 degrees.

(3) Angle or elevation and azimuth of object(s) upon disappearance.

(4) Description of flight path and maneuvers of object(s).

Heading SW then West towards and landing on mountain.

(5) How did the object(s) disappear? (Instantaneously to the north, etc.)

Still visible

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)

5 minutes plus

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, ground - electronic, air electronic. (If electronic, specify type of radar.)

Ground visual

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof. None

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station. _____

d. Time and date of sighting:

(1) Zulu time-date-group of sighting. 22/0600Z Feb 67

1300 MST

(2) Light conditions. (use one of the following terms: Night, day, dawn, dusk) Night

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given in electrical reports, such as "2mi N of Decville; "3mi SW of Blue Lake". Typographical errors or "garbling" often results in electrically transmitted messages, making location plots difficult or impossible.

EXAMPLE: 89 45N, 192 71W for 39 45N, 102 21W.

89 45N, 192 71W, Englewood

f. Identifying Information on Observer(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability. Mrs. [redacted] 42, Nurse, stated it was not a figment of her imagination.

(2) Military - Name, grade, organization, duty, and estimate of reliability. _____

g. Weather and winds -- Aloft conditions at time and place of sightings:

(1) Observer(s) account of weather conditions. Clear

(2) Report from nearest AWS or U.S. Weather Bureau Office of wind direction and velocity in degrees and knots at surface, 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000' if available. _____

(3) Ceiling. Clear

(4) Visibility. plus 15

(5) Amount of cloud cover. None

(6) Thunderstorms in area and quadrant in which located. _____

None

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting. _____

None

i. Interception of identification action taken (such action may be taken whenever feasible, complying with existing Air Defense directives). _____

None

j. Location, approximate altitude, and general direction of flight of any air traffic in the area at time of sighting. _____

Heavy traffic in Denver area.

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s). _____

possibility aircraft.

l. Existence of physical evidence, such as materials and photographs. _____

EDWARD E. VIGEE, Major, USAF
Chief, Operations Services Division
